Author Index

Page numbers in italics refer to authors of books reviewed.

Abbott, R. J., 15–20, 295–298
Alcorta, E., 7–14
Allen, J. A., 329–334
Alonso, S., 318–319
Aoki, K., (Ed.), *157*

Bahrman, N., 87–90
Barbieri, M., *154–156*
Barton, P., 318–319
Benito, C., 47–54
Bernardo, A., 455–461
Biben, C., 318–319
Biemont, C., 335–346
Bird, J. M., 313
Biro, S., (Ed.), *470*
Black, W. C., 173–181
Blonstein, A. D., (Ed.), *469*
Bogyo, T. P., 61–67
Bougourd, S. M., 253–256, 257–261
Boyle, J. M., (Ed.), *476*
Breshears, D. D., 139–146
Brown, J., 147–153
Buckingham, M. E., 318–319
Bulfield, G., 315
Burgos, M., 125–127
Burkhardt, F., (Ed.), *156–157*

Caligari, P. D. S., 147–153, 355–366
Campos-Ortega, J. A., *158*
Candela, M., 47–54
Cardin, M-L., 87–90
Carroll, C. V., 313
Carroll, D. P., 315
Carter, R. E., 314, 314–315
Casselton, L. A., 312–313
Charlesworth, D., 445–453
Chatterjee, S., 269–272
Chen, Yung Fu, 315
Chevalier, P., 61–67
Childs, D., 229–235
Chowdury, K., 317–318
Clarke, B. C., (Ed.), *157–158*
Clayton, G. M., 312
Cohen, A., 318–319
Cold Spring Harbour Laboratory, *475–476*
Collins, A., (Ed.), *476*

Index of Species

Page numbers in italics refer to the subjects of the papers

Adalia bipunctata, 292
Aedes albopictus, 25, 26, 173–181
  hendersoni, 180
  triseriatus, 180
Alces alces, 225
Allium schoenoprasum, *253–256*, *257–261*
Amphicarpaea bracteata, *27–31*
Amsinckia grandiflora, 37
Anolis grahami, 173
Antirrhinum majus, 237, 256

Brassica, 452

Caledia captiva, *39–46*
Capreolus capreolus, *221–227*
Cervus elephus, 144, 225
Cheranthus cheiri, 37
Clarkia, 247, 263
  amoena, 237, 245, 246
    subsp *lindleyi*, 245
  arcuata, 237, 245
  bottae, 245
  davyi, 245
  gracilis, *237–246*
    subsp. *albicaulis*, 237, 245, 246
      gracilis, *237–246*
      sonomensis, *237–246*
      tracyi, 237, 245, 246
  imbricata, 245
  lassenensis, 237, 246
  nitens, 245
  purpurea, 245
  rubicunda, 237
  xantiana, 237
Costus allenii, 260
  laevis, 260
Culiseta longiareolata, *21–26*

Dactylis glomerata, 375
Dahlia variabilis, 375
Dama dama, 225
Dasyuroides byrnei, *77–85*
Dasyurus hallucatus, *77–85*
  viverrinus, *77–85*
Dipcadi serotinum, *247–252*
Drosophila, 21, 25, 47, 58, 59, 116, 135, 157, 229, 234, 263, 305, 343, 421, 423
Drosophila ananassae, *269–272*
  arizonensis, *299–304*
  hydei, 364
  mauritiana 44, 299
  melanogaster, *7–14*, 25, *55–60*, *101–107*, *119–123*, *129–137*, 157, 158(*bk. rev.*), *205–212*, *213–219*, *273–281*, 292, 299, 304, *335–346*, *355–366*, *367–374*, *403–414*, 415, *427–433*
  mojavensis, *299–304*
  pavani, 269, 271, 272
  persimilis, 269, 271, 272
  obscura, 59
  pseudo-obscura, 59, 269, 271, 272, 301
  sechellia, 299
  simulans, 44, 129, 299, *403–414*
  subobscura, 269, 272, 284
  virilis, 25
  willistoni, 364

Eliomys quercinus, *125–127*
Endymion non-scriptus, 256
Eudyptula minor, *69–76*
  albosignata, 69
  iredalei, 69
  variabilis, 69
Euplectes progne, 291
Euthystira brachyptera, *383–386*

Fagus sylvatica, *91–100*
Felis domesticus, 144

Gammarus oceanicus, 229
Gilia achilleifolia, 257
Glycine argyrea, 443
Godetia, 245
Gossypium, 237
guppyfish see *Poecelia*

Haplopappus spinulosus, 375
Helianthus, 247
Homo sapiens, 144
Hordeum, 229, 247
Hordeum vulgare, 65, 148
Hyacinthoides non-scripta, 256
Hyla cinerea, 44
  gratiosa, 44

Ipomoea purpurea, 237, 256, 261, 439, 443
Isoodon obesulus, *77–85*
  macrourus, *77–85*
Isotoma, 47

Lasiorhinus latifrons, *77–85*
Lepidodactylus lugubris, *463–467*
Lilium callosum, 267
Little Blue Penguin see *Euclyptula*
Locusta, 41
  migratoria, 203, 401
Lythrum salicaria, 37

marsupials, *77–85*
Mazama americana, 144, 225
Medicago falcata, 375
  sativa, 375
Megadyptes antipodes, *69–76*
Microtus agrestis, 144
Mimulus guttatus, 443
Mus, 45
Musca autumnalis, 173
Muscari comosum, 251
Myotis californicus, 144
  velifer, 144
Myrmeleotettix maculatus, 267, *383–386*

Nemesia strumosa, 237
Nicotiana rustica, *1–5*, 147
  tabacum, *1–5*

Odocoileus virginianus, *139–146*, 229
Oenothera, 47
Oryctolagus cuniculus, 173

Panicum maximum, 162
Papaver rhoeas, 237
Perognathus californicus, 144
Peromyscus maniculatus, 144, 229
Perameles gunnii, *77–85*
nasuta, *77–85*
Petunia, 237
Pharbitis nil, 237
Phascolarctos cinereus, *77–85*
Phleum pratense, 375
Phlox drummondii, 260
Pinus sylvestris, 260
taeda, 260
Poecelia reticulata, 284
sphenops, 463, 467
Primula sinensis, 237
Proechimys guairae, 144
Pseudotsuga menziesii, 260
Pycnogaster cucullata, *197–204*
finotti, *179–204*
graellsi, *197–204*
inermis, *197–204*
sanchez-gomezi, *197–204*

Rana esculenta, 463
Rangifer tarandus, 144, 225
Rumex acetosa, *109–117*, *263–268*
arifolius, 115
rye, *47–54*, 455

Sarcophilus harrisii, *77–85*
Schistocerca gregaria, *387–401*
Scilla autumnalis, 109, 116, 251
Secale cereale, *47–54*
Senecio squalidus, 36, 37
vulgaris, *15–20*, *33–38*, 257, *295–298*
Sminthopsis crassicaudata, *77–85*
murina, *77–85*
Solanum chacoense, *183–191*
phureja, 184
rybinii, 191
tuberosum, *147–153*, *183–191*, 375
Sorghum, 247
bicolor, 380
Speonomus colluvii, *321–327*
delarouzeei, 325
hydrophilus, *321–327*
zophosinus *321–327*
Sphaeroma rugicauda, *229–235*
Stephanomeria, 247
Stercorarius parasiticus, 283
Stereopleuras martorelli, 197
Stethophyma grossum, 386
Synchytrium decipiens, *27–31*

Talpa occidentalis, *125–127*
Taraxacum, *161–171*
aristum, *161–171*
bessarabicum, *161–171*
brachyglossum, *161–171*
pseudo-hamatum, *161–171*
pyropappum, *161–171*
sect. vulgana, *161–171*
serotinum, *161–171*
ungulobum, *161–171*
Thomomys bottae, 144
Tolmiea menziesii, *375–382*
Tragopogon mirus, 375
miscellus, 375
6×triticale, *455–461*
Triticum alloplasmic lines.
Chinese Spring, 87–88
Selkirk, 87–88
Triticum (genus) *87–90*
aestivum, *87–90*, *455*
aucheri, *87–90*
bicorne, *87–90*
longissima, *87–90*
monococcum, 88
searsii, *87–90*
sharonense, *87–90*
speltoides, *87–90*
tauschii, *87–90*
timopheevi, *87–90*
turgidum, *87–90*, *455–461*
uratu, *87–90*
Tulipa australis, *109*, *116*
Turnera ulmifolia, *375*

Vandiemenella, 266

Vombatis ursinus, *77–85*

Wapiti, 225
White-tailed deer see *Odocoileus virginatus*

Zea mays, 115, 267, 380
Zoarces viviparus, 229

Subject Index

Adh polymorphism and environment, 403-414
Ag-Staining significance in mitotic NOR's, 125-127
apostatic selection on a colour monitor, 329-334
autopolyploids, genetics of, in plants, 375-382
autosomal sterility factor in *Drosophila*, 299-304

B-chromosomes, synaptonemal complexes of, 383-386
behaviour in germination of groundsel, 15-20
behaviour of pollinators in groundsel, 295-298
biochemical variation in roe deer, 221-227
biological characters of *Drosophila* larvae, 205-212, 213-219
breeding structure of *Aedes albopictus*, 173-181

cave dwelling beetles, genetic structure of, 321-327
C-banding patterns in wheat and rye chromosomes, 455-461
chaeta characters, stabilising selection on, 427-433
chiasma formation in the locust, 387-401
chiasma frequency in Marsupials, 77-85
chlorophyll deficiency in selection of *Nicotiana* hybrids, 1-5
chromosomal variants in natural populations, 263-268
chromosome arrangement in natural populations, 269-272
chromosome assay in *Drosophila*, 355-366
chromosome banding in the mosquito, 21-26
chromosome pairing in wheat hybrids, 455-461
chromosome polymorphism in rye, 47-54
competitive interactions in *Drosophila*, 355-366
components in diallel crosses, 347-353
cross prediction methods in breeding potatoes, 141-153
cytoplasmically encoded proteins in *Triticum*, 87-90

deferring senescence in *Drosophila*, 367-374
disease resistance in *Amphicarpaea*, 27-31
duplication of PGI genes, 247-252

estimation of genetical components in diallel crosses, 347-353
ethanol levels, effect of environment on, in *Drosophila*, 403-414

flower characters in *Clarkia*, 237-246
flower colour variation in *Allium*, 253-256
F-statistics and mating system in Beech, 91-100

gametic disequilibrium, use of to infer recombinational hotspots, 435-438
genetical analysis of olfactory response in *Drosophila*, 7-14
genetical control of aggression and response, 129-137
genetic analysis of flower colour in *Allium*, 253-256
genetic differentiation in Beech, 91-100
genetic heterozygosity and interchanges in rye, 47-54
genetic insights into autopolyploids, 375-382
genetic models for endosperm character, 61-67
genetic structure of dandelions, 161-171
genetic studies in *Clarkia*, 237-246
genetic system of marsupials, chiasma frequency in, 77-85
genetic variation of the Little Blue Penguin, 69-76
genetic variation in deer, 139-146
genetic variation in *Drosophila*, 55-60
genetic variation in natural populations, 234
genomic differentiation in potato species, 183-191
genotypic frequencies in a mosquito, 173-181
genotypic variation in *Drosophila*, 119-123
germination differences in groundsel, 15-20
germination, inhibition of, in groundsel, 33-38

handicap principle models, 283-293
heterozygotes, deficiencies of, in beetle populations, 321-327
heterozygosity in deer, 139-146
high temperature, effect of, on chiasma formation, 387-401
hybrid sterility in *Drosophila*, 299-304
hybrid zone in a grasshopper species-complex, 39-46

inbreeding depression in *Allium*, 257-261
inheritance of supernumerary segments of *Rumex*, 109-117
introgression of mitochondrial DNA, 39-46

larval competition and productivity in *Drosophila*, 119-123, 205-212, 213-219
larval fitness in *Drosophila*, 273-281

mating and chromosomal arrangement, 269-272
mating preferences, measurement of, 305-310
mating system and evolution in Beech, 91-100
mating system estimation, 439-444
meiotic behaviour of wheat hybrids, 455-461
mendelian and non-mendelian inheritance, 263-268
mitochondrial variation in a grasshopper, 39-46
mobile element polymorphism in *Drosophila*, 335-346
multivariate cross prediction in a clonally reproduced crop, 147-153

nucleolar organiser regions in spermatogenesis, 197-204
null and normal alleles, comparison of, in *Drosophila*, 101-107

one pollen parent model, 439-444
outcrossing rate in natural populations, 257-261

PGI genes in *Dipcadi serotinum*, 247-252
PGI polymorphism in *Sphaeroma*, 229-235
phenotype variation and selection, 193-195
pollen inhibition in groundsel, 33-38
pollinators and outcrossing in groundsel, 295-298
polymorphism of mobile elements in *Drosophila*, 335-346
population genetics of a colonising species, 173-181
population genetics model, 445-453
progeny array as a unit of observation, 439-444

recombinational hotspots and gametic disequilibrium, 435-438
recombination in diploid potatoes, 183-191
relationship between four penguin populations, 69-76
restriction endonuclease variation in *Drosophila*, 101-107
restriction enzymes and chromosome banding, 21-26

selection, apostatic, by humans, 329-334
selection at sex-linked loci, 415-425
selection component analysis in *Sphaeroma*, 229-235
selection for aggression and response in *Drosophila*, 129-137
selection, stabilising, of chaeta characters in *Drosophila*, 427-433
senesence genes in *Drosophila*, 367-374
sex chromosomes of an unisexual lizard, 463-467
sexual and asexual dandelions, 161-171
somatic hybrids in *Nicotiana*, 1-5
spermatogenesis and nucleolar organiser regions in *Pycnogaster*, 197-204
sporophythic self-incompatibility systems, maintenance of, 445-453
streptomycin resistance in *Nicotiana*, 1-5
stress in *Drosophila*, 273-281

supernumerary segments in *Rumex*, 109–117
synaptonemal complexes in grasshoppers, 383–386

tetrasomic segregation, evidence for, in plants, 375–382

unisexual lizard, sex chromosomes of, 463–467

variable polypeptides in *Triticum*, 87–90
variation in disease resistance in *Amphicarpaea*, 27–31
variation in fitness components of *Drosophila*, 55–60
variation in olfactory response in *Drosophila*, 7–14
variation in roe deer, 221–227
